

Meeting on progress of project

8 December 2025

The partners of the "Issue of Identity: Visions of European Integration in V4 and Nordic Countries" project held an online progress meeting to review the advancement of the project's two key deliverables. Every partner institution was represented, ensuring that all perspectives were included in the discussion.

Partners reviewed the completed systematic disciplinary reviews and agreed that the materials were of high quality, warranting future publication in an expanded form that will incorporate additional contributions from the project's international conference.

Regarding the joint educational course, partners agreed on next steps, with the detailed course structure to be finalised by 8 January. The University of Pécs will host the completed educational materials on its Moodle platform, making the course accessible to a wide audience of students and researchers.

The meeting confirmed that both deliverables remain on track, bringing the project closer to its goal of fostering interdisciplinary dialogue on sovereignty and federalism in European integration.
